Introduce Yourself with iMovie

We have produced a video guide showing teachers how children can introduce themselves to children in another school by creating a slideshow in iMovie. You can see the video guide by visiting tinyurl.com/vidintro or by scanning the QR code below.

To share your finished films you can use Google Drive or OneDrive. Both these cloud storage solutions enable you to place all your films in a folder where they can be viewed by another school. There is a separate guide for using Google Drive for this.
