

Plastic Bottle Skittles

What you'll need:

- Some small plastic bottles
- Old packaging/food wrappers/paper
- A spoon with a long handle
- Tape (optional)

How's how to make your skittle.

1. Wash some plastic juice/pop bottles ready to fill.
2. Fill each bottle with any old packaging or food wrappers you have in your house. This will help to weigh the skittle down.
3. Use a wooden spoon to push down the pieces so the bottle is full and does not fall over.
4. As an added extra add numbers to the bottles using tape so you can score your skittle games.
5. Play the game!
