L3b: Identity Maps based on 'Incredible You' – Digital Identity Word Clouds

The Linking Network

Word Clouds are an interesting way for children to create a Digital Identity Map. There are a variety of websites that can be used to create free Word Clouds. These can then be printed and kept for personal reflection or downloaded and sent to the linking class.

What to do:

1) Follow the Identity Maps lesson plan to enable children to explore and discuss their own identity.
2) Choose a website to create the Word Clouds on. Here are a few suggestions but you might know of others:
    - https://www.wordclouds.com/
    - https://wordart.com/
    - https://worditout.com/word-cloud/create
    - http://www.wordle.net/
3) Children choose a selection of words that represent the different aspects of their identity.
4) Input the words onto the website.
5) Children can customize font, colours and layout to their own taste.
6) Press the 'create' button to create the Identity Word Cloud.
7) Print the Identity Word Cloud or download as an image file. Optional - exchange with the link school using email, PPT, post, or another method that you may choose!
